

1.) Release the latches on the case to access the inside.

2.) Remove the 110v power cord and the Ethernet cable from the case

3.) Plug the Ethernet cable into the case then into a PC or Laptop.

4.) Close the case and secure the latches.

- 5.) Plug the female 110v power cord into the case, then the male into 110v power receptacle.

- 6.) Make sure everything is powered properly and an internet connection is completed before using. Allow approximately 3 minutes for the modem to make a cellular connection.

Note: *Email Matt Humbert to get Max Connect Case initial setup walk-thru.
